

IMS POLICY

GrapheneUP SE is a private company focused on development and production of graphene and composite materials (according to CZ NACE 20.59.9). The company sales its products to the processing entities both in the Czech Republic and abroad. Other stakeholders that also have impact on the company are the employees of the company, suppliers, neighboring organizations, local governments and state governments.

The registered office of the company is located at Studeněves 13, 273 79 where both administrative and all production activities are carried out.

For effective management of the company and all processes with respect to environmental protection, the company implemented a management system according to international standards ČSN EN ISO 9001: 2016, an environmental management system according to ČSN EN ISO 14001: 2016 and a system of health and safety management according to ČSN ISO 45001 : 2018 (hereinafter the Integrated Management System, IMS).

First and foremost, we place great emphasis on the use of proven materials, adherence to technological principles, communication with the investors and, last but not least, the fulfillment of our agreements. Continuous improvement is also required in all areas related to environmental protection and and safety management.

In order to successful implementation of the objectives, the company's management approved this Policy, which forms the framework for the partial goals and directions of actions. Through them, it implements the steps needed to improve IMS, enabling employee involvement, reducing the impact of negative environmental aspects and risks at work. We consider the management system as a constantly evolving part of management

We see our customers and suppliers as partners. With this partnerships based on the company's tradition, mutual trust and individual approach to meet the expectations, we create the conditions for further development of the company.

One of the key aspects for successful and effective management is the fulfillment of binding obligations arising from both legislative and normative, contractual and other requirements.
